

EXCELSIOR INFORMA

COMPANY EMPLOYMENT SCHEMES OBTAINED FROM THE CHAMBER OF COMMERCE SYSTEM

Friuli Venezia Giulia Year 2022

Introduction

The international problems of a political and economic nature linked to the conflict in Ukraine do not so far seem to have had a negative impact on the 2022 employment requirements forecast by private industrial and services companies operating in Italy. Among the companies with employees, those that have planned to hire are 60% of the total, a percentage substantially in line with that recorded last year. On the other hand, we notice significant growth in expected inflow of workers into companies - with any form of contract - passing from 4.6 million units in 2021 to around 5.2 million in the current year (an increase of about 11%). While the propensity of companies to resort to young workers remains almost unchanged, a significant increase in their difficulty in recruiting the profiles they are seeking emerges, concerning 41% of inflow (compared to 32% last year). In almost two out of three cases, the expected recruiting problems appear to come from a scarce presence of people available and only in one out of three cases it can be attributed to an inadequate skill-set of candidates or to other reasons. This publication focuses on the main characteristics of the inflow planned in the region for the year 2022.

SUMMARY Work opportunities in 2022 in the region					
			Expected inflow (a.v.)	% diffi reci	
Company areas of inclusion and the main professions	page 2	Specialised labourers	19,580		67.2
Main characteristics of workers requested by the companies	page 3	Technical professions	13,350		57.1
Characteristics of inflow by age group	page 4	Managers and intellectual, scientific and highly-specialised	5,800		56.0
Skills requested	page 5	Plant operators and stationary and mobile machinery operators	15,020		52.9
Qualifications that offer the greatest job opportunities	page 6	Skilled professions in commercial activities and services		29,910	39.8
Several characteristics of the companies	page 7	Employees	8,520		38.4
Note on methodology	page 8	Unskilled professions	15,850		31.9

N.B. Due to the rounding off, the sum of the single percentage values may differ by 100. This note is valid for all the graphs in this bulletin that show percentage compositions.

COMPANY AREAS OF INCLUSION AND MAIN PROFESSIONS

This page shows the main company areas of inclusion, with several characteristics regarding inflow, and the professions most requested by companies for 2022 in the region. It should be noted that, unless otherwise specified, the professions indicated in the bulletin refer to the classification of professions of ISTAT CP2011 (3 digit).

Characteristics of expected inflow by business area in the region in 2022								
COMPANY AREA	INFLOW % of total (a.v.)		% up to 29 years	% difficult to recruit				
Total	108,040	100.0	31.0	48.3				
Direction and General services areas	3,830	3.5	41.1	43.6				
Administrative areas	4,830	4.5	21.0	46.5				
Technical and planning areas	15,330	14.2	31.6	61.9				
Area of production of goods and provision of the service	54,090	50.1	29.2	49.3				
Commercial and sales areas	19,020	17.6	38.3	36.7				
Logistics areas	10,940	10.1	27.0	46.9				

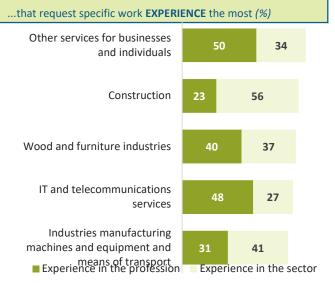

MAIN CHARACTERISTICS OF WORKERS REQUESTED BY COMPANIES

The main characteristics of the incoming figures are summarised below, organised by sector. The data concerns the difficulties in recruiting, experience required, gender and type of contract requested; the figure for the region is compared with that of the geographical distribution and the national figure.

Difficulty in recruiting (%)	Reg.	North East	Italy
Total, of which:	48.3	45.8	40.5
for lack of candidates	31.4	29.6	24.6
due to inadequate skill set	13.4	12.5	12.4
for other reasons	3.4	3.8	3.6

Experience requested (%)	Reg.	North East	Italy
Total, of which:	65.3	63.3	67.0
in the profession	24.5	22.0	23.6
in the sector	40.9	41.3	43.4
non requested	34.7	36.7	33.0

Gender requested (%)	Reg.	North East	Italy
female	18.0	18.8	18.1
male	36.0	33.0	33.4
equally suitable	46.0	48.2	48.5

Contracts proposed (% values)	Reg.	East	Italy
Workers employed by the company	76.6	78.5	80.2
with a permanent contract	16.0	16.8	18.8
with a fixed-term contract	51.7	51.6	52.5
with other contracts	9.0	10.1	8.9
Company non-salaried workers	23.4	21.5	19.8
agency workers coll. and other non-salaried	15.8	14.4	10.8
empl.	7.6	7.1	9.0

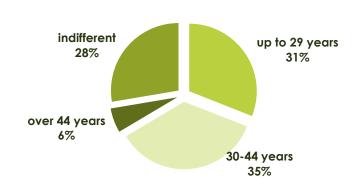

The main sectors that expect in	flow of	female	personne	l (%)
Accommodation and catering services; tourist services	33	16	52	
Cultural, sports and other personal services	28	17	55	
Other manufacturing industries	26		54	21
Retail trade, wholesale trade and repair of motor vehicles and motorcycles	25	25	50	
IT and telecommunications services	22	17	61	
■ female ■ n	nale	■ ec	jually suita	able

Other characteristics of the inflow in the region (%)							
As a replacement for outgoing personnel	36						
Regarding new figures not already present in the company	16						
Immigrant personnel	17						
The figure will have to coordinate other people	15						
Will have to apply innovative/creative solutions	22

CHARACTERISTICS OF INFLOW BY AGE GROUP

Expected inflow by age group in the region (%)

% of young people up to 29 years against the total inflow:

31.0%

A specific detailed study concerns the age groups of the professional figures requested by companies in the region in 2022, with a detailed breakdown of the professions most requested and of the main business sectors that plan inflow from the younger segment, i.e. the figures with an age explicitly indicated by companies as "up to 29 years".

The report that includes "difficulties in recruiting" offers key ideas for analysis with regard to the relationship between training and companies.

The professions with the greatest difficulty in recruiting young people

(expected inflow of young people - % share and a.v.)

	Average difficulty in Friuli Venezia	recruiting young pe Giulia region 46%	ople difficul recruit y	
	Health technicians	86%	370	430
Wood treatment toolmakers, I	abourers, craftsmen and similar	86%	660	770
Artisan mechanics, fitters, re technicians for stational	pairers and maintenance ary and mobile machines	70%	720	1,020
Machinery workers in plants fo	r the mass production of wooden items	70%	310	450
Building finisher artisans a	and specialised labourers	69%	700	1,020
Experts in mathematical, computer	natural sciences	68%	180	270
Automatic and semi-automatic mac processing	hinery workers for metal and for mineral products	66%	690	1,050

Retail trade, wholesale trade and repair of motor vehicles and motorcycles Industries manufacturing machines and equipment and means of transport

Accommodation and catering services; tourist services

Wood and furniture industries

Metallurgical and metal products industries

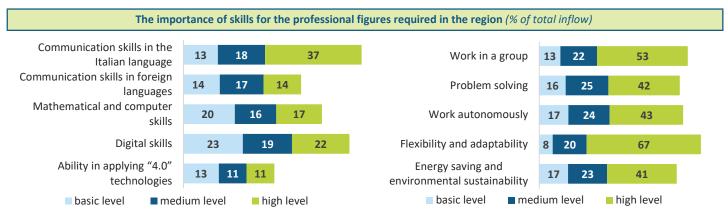

Up to 29 years ■ Indifferent

The top sectors for inflow of young people up to 29 years have been selected, as an absolute value

Friuli Venezia Giulia

SKILLS REQUESTED

A skill is the "proven ability to use, in work situations or in professional and personal development, a structured set of knowledge and skills acquired in formal, non-formal or informal learning contexts". This section analyses some of the main skills required by companies for incoming profiles, as well as an in-depth analysis of the main fields of study in the territory and the skills required for each of them.

The companies assign each skill a score from 0 (non-requested skill) to 4: the basic level corresponds to the percentage of companies that assign a score of 1 to that skill, the medium level a score of 2 and the high level a score of 3 or 4.

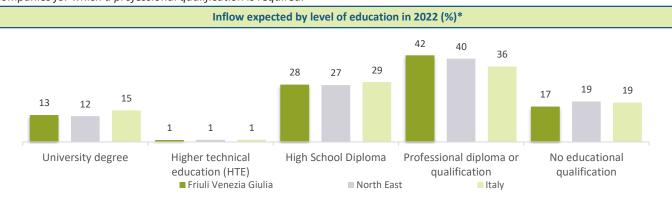

Skills considered of "high	" importa	ince acco	rding to	the mair	fields of s	tudy in the	e region [*]	k

^{*} The skills with "high" importance are those to which the companies assign a score of 3 or 4.

^{**} The data refers to the potential inflow with a professional diploma or qualification. Please refer to the introductory text on page 6 "The fields of study that offer greatest job opportunities" for the definition of potential inflow.

FIELDS OF STUDY THAT OFFER THE GREATEST JOB OPPORTUNITIES

Below, there is some data related to the levels of education and qualifications most requested of the inflow of professional figures in 2022. Data on the demand for workers with professional diplomas or qualifications is presented based on two different approaches. In fact, in addition to workers with professional diplomas and qualifications expressly indicated ("explicit inflow"), companies are looking for workers who generically went through "compulsory education". With a specific in-depth study, there have been cases in which the request for workers who have generically gone through "compulsory education" was associated with professions for which there are three-year professional training courses formally included among the 26 in the State Regional Agreement of 1 August 2019. A further potential demand for professional qualifications was thus identified and, when added to the demand explicitly expressed by the companies as part of the survey, provides an overall estimate of the "potential inflow" expected by the companies for which a professional qualification is required.

^{*} The data regarding Professional diplomas or qualifications refers to potential inflow

The	e fields of study mos	t highly requested in the r	egion

SEVERAL CHARACTERISTICS OF THE COMPANIES

This page presents several characteristics of the companies that are hiring, highlighting the relative share of the total number of companies with employees present in the region, and detailed breakdown by size class. The training carried out by companies for their employees in 2021 and 2022 and the share of companies that hosted trainees/interns in 2021 is also analysed. The page also presents some data on the investments made by companies in the various areas of digital transformation in 2022 and on the channels for selecting incoming personnel.

in newspapers, labour consultants, other channel

and in 2022 in relation to each aspect of digital transformation

Note on methodology

The data presented comes from the Excelsior survey carried out by Unioncamere in agreement with the National Agency for Active Labour Policies (ANPAL). The survey, which is included in the National Statistical Programme (UCC-00007) among those that imply an obligatory response, has been carried out on a monthly basis since 2017.

The information contained in this bulletin was acquired by processing all the information obtained through the monthly surveys carried out until the month of August 2022, mainly by using the compilation technique in CAWI mode, carrying out about 285,000 interviews at companies, a representative sample of companies with employees in 2021 in the various industrial and services sectors. The estimate of the inflow forecast is obtained through modelling of the historical series of data taken from administrative sources on companies and employment, suitably integrated with the sample data relative to each monthly survey. Inflow (i.e. the number of employment contracts that companies intend to enter into in a certain period) and the relative characteristics refer to the hiring of employees and flows of collaborators, temporary workers and other non-employee workers. The data regarding the forecast for the entire year therefore no longer come from a specific annual survey, but from the integrated processing of the available monthly surveys.

In this bulletin, the analysis focuses mainly on the characteristics of the planned inflow in 2022, according to the professional profiles and levels of education requested. There are also some qualitative comparisons with the 2021 data. The results of the survey are available at provincial and regional level according to a variable number of economic sectors, obtained as a grouping of economic activity codes of the ATECO2007 classification. The distribution of inflow envisaged by "professional group" refers to the codes of the ISTAT CP2011 classification.

Excelsior Informa is created by Unioncamere in collaboration with ANPAL as part of the Excelsior Information System.

For in-depth information, refer to the following website: http://excelsior.unioncamere.net where data and analyses referring to all the regions and all the provinces is available.
